

Drivers of long-term changes in biodiversity, ecosystem integrity and key ecosystem structures

Climate change impact on ecosystem processes

Altered nutrient cycles and environmental pollution

Advances in long-term socio-ecological research and sustainability science

New methods, technology and innovative science support services

Emerging issues and challenges for ecosystem research

CALL FOR WORKSHOPS

The IILTER OSM Programme Committee strives to promote new formats (i.e. workshops) that are organised from the bottom-up. Proposed workshops should focus on IILTER relevant topics (including new ideas) and be of interest to more than 10 participants. Workshops will be run in parallel with timeslots varying usually between 1.5 to 3 h. We cordially invite those who wish to organize a workshop at the OSM to submit an abstract. The abstract should cover information on the proposed topic, the organiser(s), the relevance for IILTER and the assumed number of participants (which community is addressed particularly) with a maximum of 2,500 characters including blanks.

Please fill in our docx-form and submit your workshop proposal until

3rd March 2019 to ilter2019@fu-confirm.de

We are looking forward to receiving your workshop proposals!
